| 5 Check version                                 | 9 |

## 1 Download latest Vibes Release + Resource data

- Navigate to <https://my.mayer-emi.at/products/vibes-md850>
- Navigate to Software Updates
- (1) Download Vibes V4.00,[?] for manual installation
- (2) Download Vibes V4.00,[?] presets,patches ... for manual installation

### Files required

The installation process requires both files.

If the resource (presets, ...) file is not found on the stick, the installer attempts to download it during installation (this needs the vibes to be connected to the internet during install)

MEXP - Vibes-MD850

Upgrade now and unlock a new realm of possibilities with VIBES XVAOS Version 4.00,B. Elevate your music production workflow, enhance control, and experience unparalleled performance.

This update can be installd on top of V3.03,A or later.

The Update is direct installable via online update.

All Integrated Synthesizers

Starting Sound Engine ...

For manual update via USB Pen Drive:

- 1 [Download Vibes XVAOS V4.00,B with Vibes Connect for manual installation](#)
- 2 [Download Vibes V4.00,B presets, patches and performances for manual installation on devices with current installed version 3.x \(380MB\)](#)

If you already have V4.00,A installed download the updated patch set instead:

- 1 [Download Vibes V4.00,B updated presets, patches and performances for manual installation \(75MB\)](#)

### Changelog

Put both files (.pkg and one of the preset .tar.gz) on the USB Pen Drive root directory before inserting into the Vibes for intallation!

Check [Installation Instructions](#) for manual install

## 2 Copy to MEMI USB Stick

- Copy the File "MD850-Update-V4.00.[?].md850.pkg" into the root directory of the MEMI USB Stick
- For installing on top of V3.x copy the File "vibes-res-v4.00-files.tar.gz" into the root directory of the MEMI USB Stick
- or -
- For installing on top of V4.00,A copy the File "vibes-res-v4.00-delta-files.tar.gz" into the root directory of the MEMI USB Stick

(1) Ensure the USB Pen Drive has the name "MEMI"

- or -

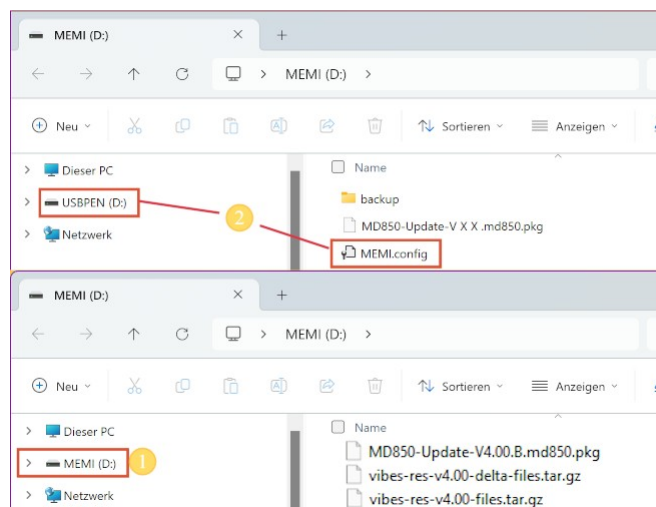

(2) Ensure there exist a file named "MEMI.config" in the root of the USB Pen Drive (The file can be empty)

### Files required

The installation process requires both files.

If the resource file ("vibes-res-v4.00-files.tar.gz" for installing on top of V3.x or "vibes-res-v4.00-delta-files.tar.gz" for installing on top of V4.00,A) is not found on the stick, the installer attempts to download it during installation (this needs the vibes to be connected to the internet during install).

### 3 Insert USB Stick

1. Insert the USB Pen Drive in one of the USB Host Ports on the back of the Vibes

## 4 Installer screen

Wait for the installer screen to show up. Doublecheck the version to install.

1. Press first wheel knob to start installation
2. Press fourth wheel knob to exit the installer without installation

## 4.1 Installation done

After installation has started, the installation steps are logged.

The synthesizer engine will start up automatically after installation has finished.

## 5 Check version

1. Select the SETUP / DIAG pane on the touch screen
2. Check for Version "4.00 Rev:X"
